

## Are colds, flu and viruses passed around your office?

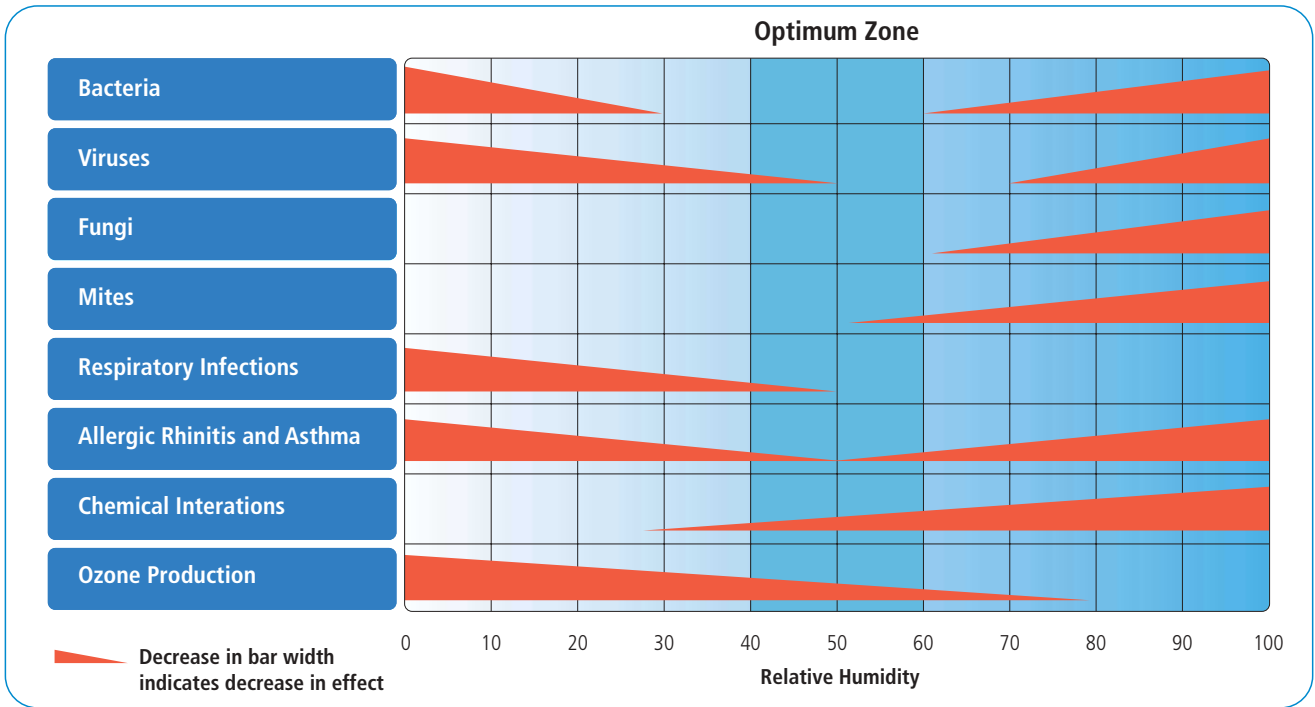

### Do the people in your building suffer from sore throats, dry or flaky skin or irritation of the eyes?

- Ⓥ A contributory factor could be a low humidity level in the work place.
- Ⓥ Winter, the cold and flu season is the time when humidity levels in buildings are at their lowest.
- Ⓥ Modern offices fitted with the most up-to-date air conditioning systems can all too often suffer low humidity levels.

# Humidification Effectiveness Chart

Vapac are offering free site surveys throughout the year and there's even a bounty on any make or model of humidifier that needs replacing.

The solution may be as simple as turning your existing generator on or replacing the cylinder.

If you require further details or a free site survey, please complete below and fax.
