VAPASURE
MAINTENANCE CONTRACT

VapaSure Maintenance Contract Request

VapaSure is a maintenance package that can be tailored to suit individual's customer's requirements. A number of factors can affect the level and frequency of maintenance that a humidifier requires. We can survey your system and recommend an appropriate level of maintenance.

There will usually be an annual service carried out during the summer period when the demand for humidification is at its lowest. We will then recommend a number of additional interim service visits, the frequency of these visits will vary dependant on the level of usage of the system and the quality of the water being used to feed the system.

The contract will provide a detailed maintenance schedule which will outline all the aspects of the service to be provided at each visit. We would provide a list of recommended spare parts that can be kept on site, specific to the type and quantity of humidifiers. This ensures the right part is available immediately, and the humidifier is back to full operational condition without delay. All spares bought for stock will be subject to a 10% discount. The engineers will carry common spares that can be fitted as necessary and charged out at the discounted rate.

A service coordinator will schedule all works and liaise with the customer.

Our engineers provide a detailed report outlining all works carried out and any additional works and parts that maybe required. Any remedial works will be carried out at the earliest opportunity.

Shortly after your initial enquiry you will be contacted by a member of our Sales Team, who will arrange for a detailed system survey to be carried out on your site. We will comment and report on your equipment, system, installation and application. We will then send you a proposal outlining the number of visits required for your system, a schedule of work, and a VapaSure Contract for you to sign should you wish to proceed with our proposal.

The holder of any VapaSure contract is automatically given access to Vapac Humidity Control Limited service network for any interim works they require.

In addition customers who take out a Vapasure contract within six-months of purchase will benefit from the standard two-year warranty being extended for a further year.

For further information and to arrange your free humidifier survey contact us in the following ways.
